

## LEARNING OUTCOMES

Certificate

Program: Private Security

Upon completion of this program, students will be able to:

1. Demonstrate knowledge of the history of private security; list the various industries within private security; and illustrate the similarities and differences between private and governmental security forces.
2. Identify and demonstrate how to collect and preserve evidence; use deductive reasoning; and interview witnesses for investigative purposes.
3. Discuss the legal structure of private security, and identify the law as it relates to contracts, agencies, and employment.
4. Identify how to protect computer systems, network systems, and information assets related to private security information protection.
5. Explain the concepts of emergency management in the private and public sector, and be able to identify risks, hazards, crises, emergencies and disasters.
6. Obtain and demonstrate practical, hands-on training in private security tactics, including: weaponry; chemical spray, and controlled force.
