## Placement for Success

## Your success matters.

College readiness and appropriate placement can affect student success. Therefore, the Placement Tables indicate which English (writing), reading, and math courses are recommended. English " $E$ ", reading " $R$ ", and math " $M$ " prerequisites are found in the course description section of the catalog. For courses with these designations, students are encouraged to obtain minimum scores on the following sections or to successfully complete the required prerequisite courses prior to registration for those classes. To place into math courses above MATH 105 or MATH 107, GPA will not be used, and the scores listed below in one category are required.
