

Education

Associate in Arts Degree

Why Education?

If you enjoy sharing a passion for learning, working with youth, making a difference in people's lives, and shaping the future, then majoring in education may be right for you. A career in education offers a person an exciting, challenging, and creative work life combined with a more flexible lifestyle. Teachers role model to their students: life-long learning, critical thinking, field knowledge, and life skills. Professional development and continuing one's education, typically through Master's degree studies, are standard in this line of work. Teaching is one of the most challenging, yet personally rewarding careers, and Bay College is here to help you get started on your path toward becoming an educator.

Why Bay College?

The Education program at Bay College provides students with the opportunity to start their education studies in a supportive environment with individualized attention and smaller class sizes. Students majoring in education will benefit from the role modeling of best-practice teaching methods, both online and on campus, by highly educated and trained faculty, who are focused on student success!

Beyond Bay College

Students interested in transferring to a four-year institution to obtain a bachelor's degree or higher may find opportunities in the following areas of study:

- **Elementary Education**
- **Secondary Education**
- **Special Education**

Career Opportunities

O*NET OnLine has detailed descriptions of the world of work for use by job seekers, workforce development and HR professionals, students, researchers and more!
